

Ultra BODYTODDY®

Why do we say it's... The Most Potent Nutritional Force on the Planet?

There are many requirements that must be met in order to produce an effective and beneficial supplement, no other liquid dietary supplement can offer you...

- ***A Complete Formula***

Over 130 nutrients are packed into Ultra Body Toddy® that means you are getting everything your body needs in one bottle! It's unlike any other product on the market.

- ***Synergistically Bio-Available Nutrients***

It's not enough to just put the nutrients in the bottle! They must be readily accessible to the body at the cellular level. The only place nutrients do any good is within the cells themselves. If the nutrients can't get to the cells - they are useless and will pass through the body without being absorbed.

- ***The Correct Ratios***

The ratio of one nutrient to another determines how accessible the nutrients are to the cells. For example, you can have all the calcium in the world but if you don't have other nutrients such as manganese and boron, the calcium cannot be absorbed and will go to waste.

- ***Bio-electrically Charged Minerals***

If the minerals within a formula don't have the correct bio-electrical potential, the cells will repel them and they will go to waste. Plant sourced minerals are attracted to the body because of their negative charge, which makes them bioelectrically available. It's a case of opposites attracting!

***Buyer Beware - Not all Liquid Supplements are the Same!
Ratio, Potency, Bioavailability and Absorption are the Name of the Nutrition Game!***
